Remark : Beger Super Gold A/E 234 and A/E 303 is able to coat on synthetic enamel paints by diluting with Beger Thinner M-1188.						
						

Recommended Painting System

New Masonry

- Leave the wall to dry for 30 day.
- Make sure that the wall is cleaned and without dirt or oil stains.

Old Masonry

- Remove the old paint and clean with water. (Not recommend to use metal brush)
- In case there are mold or fungus on wall surface , should remove its before applying Beger Mould free M-001. No need to clean up with water after apply, Just let it dry.
- Apply primer Beger Multi-Purpose Primer B-1900 for 1 coat.

Metal surface

- Clean the surface and make sure that it don't have dirt or oil or rust. For smooth surface, recommend to rub with sand paper 200-280 in order to increase adhesion between surface and topcoat.
- After finish cleaning the surface, apply Beger Super Gold products for 2-3 coats.

Primer

We can apply primer Beger Super Gold (by spraying). For concrete surface, recommend to apply primer Beger Super Gold A/P 1002 (yellow) or A/P 1001 (red) 1-2 coats. For metal surface, recommend to apply primer Beger Super Gold A/E 8855 (yellow) 1-2 coats. Primer will help to increase adhesion between surface and topcoat.

Top coat

Recommend to apply at least 2-3 coats of Beger Super Gold. For better gloss finish, recommend to use the clear topcoat Acrylic Lacquer A/E 4400, or A/E 9000 for the last coat.

Caution : - Use under well ventilated condition.

- Do not breath or inhale product mist.

- Avoid direct contact to eyes or skin. In case accident, should immediately clean with water.
